

PASHUPATI
COTSPIN LIMITED

TO WHOM SO EVER IT MAY CONCERN

This is to certify that 104 spindles **SMEW** make Assembly winder with **BLDC technology** are in operation from last 6 months .We are fully satisfied with working performance of the same as well as after sales support given by SMEW.

We are also happy to certify that as per their claim for BLDC motor technology, we are getting POWER SAVING to the tune of 50 to 60 percentage as well as length measurement accuracy within 1 percent range.

In our unit, we also have Assembly Winders with propeller winding and performance of the SMEW Assembly Winders is quite comparable with Propeller type machines.

We are getting 950 to 975 gms weight in 125mm dia. in SMEW Assembly Winder for 2/20s count yarn. With propeller technology we are getting 1000 gm packages.

Looking at the capital cost, power cost and lower maintainence costs of SMEW Assembly Winders with BLDC Motors we are fully satisfied and happy with our decision to purchase their machines.

WE wish them all the success in their developement.
